## LED Lighting System

The cutting edge of uniform brightness

# Tetra® EdgeStrip

## Lighting from the Edge!

New **Tetra EdgeStrip** is engineered to install easily around the edge of signs with a 76 mm to 152 mm can depth. Perfect for single or double-sided signs, **Tetra EdgeStrip** delivers money-saving advantages over T8 fluorescent tubes while producing outstanding visual performance that protects end-user brand image. Discover the new LED alternative that can handle shallow cabinet signs—**Tetra EdgeStrip**.

### The OptiLens™ Difference.

Tetra EdgeStrip uses OptiLens™, GE's unique lens technology which captures otherwise wasted light and redirects it towards the illuminated surface to create an exceptionally uniform sign.

T8 fluorescent tubes can create an unwanted “striping” effect where the space between the tubes appears darker. This visual distraction sends the wrong message about your business, and undermines your overall brand image.

# NEW! Tetra EdgeStrip HO

- **Tetra EdgeStrip High Output** is **175%** brighter than standard Tetra EdgeStrip, commanding attention to your customer's brand image.
- **Tetra EdgeStrip High Outputs** has **3.5X** more LEDs, vastly improving the uniformity across any sign face and creating greater color consistency.
- **550** lumens per module with the same loading - 17 modules/24V/100W driver.
- Tetra Edgestrip HO has NEW heat sink to manage thermals

For application illustration only, subject LED system was placed into environment.

Don't settle for the *performance limitations* of T8 Fluorescent tubes.

### Cover any angle or curved shape with uniform LED light.

Tetra EdgeStrip is designed to fit into the frame of cabinet signs, meaning that curved, angular or custom shaped signs can now benefit from LED technology! Unlike fluorescent tubes, that are hard to fit into unique signs and create shadows and stripping, Tetra EdgeStrip can tightly follow the contour of the sign's frame and distribute uniform light to every inch of the sign face. Protect the brand image of your business by using Tetra EdgeStrip LED lighting system in your sign!

### Impressive Energy Savings.

When you make the switch from T8 Fluorescent tubes to the advanced technology of Tetra EdgeStrip, you give up some brightness for the exceptional uniformity and impressive energy savings of LED. This superior efficiency produces energy savings up to an incredible 78%. Imagine the positive impact that will have on your bottom-line over the long life of the system.

Energy Consumption Comparison

### NEW! Tetra EdgeStrip HO

3.5x more LEDs, vastly improving the uniformity across any sign face and creating greater color consistency.

550 lumens per module with the same loading - 17 modules/24V/100W driver.

NEW heat sink to manage thermals.

175% brighter than standard Tetra EdgeStrip.

Robust design to protect against moisture, dust and damage.

Continuous wire through LED module uses IDC connectors for maximum strain relief.

### Tetra EdgeStrip

Overmolded design protects against moisture, dust and damage.

Can be cut on wires between modules.

OptiLens™ maximizes the area of light coverage by creating a narrow, uniform viewing angle.

Pre-drilled holes makes mounting easy.

3M VHB™ industrial grade mounting tape allows for greater convenience when installing.
